

DETAILS

What to Do...

- Repair rather than replace any original details.
- Replicate missing details from historic photos or physical evidence.

...and
What Not
to Do

ROOFS

What to Do...

- Do not remove an existing tile roof. Properly maintained, a tile roof will out-last any other roofing material.
- Do not use more than one roofing material on the structure.
- Do not use aluminized paints or bituminous patching materials to repair a metal roof.

... and What Not to Do
